SUMMARY

Backend-focused Full Stack Developer with 1 years of experience building scalable IoT platforms on GCP. Delivered **19+ microservices** and **20+ REST APIs** with sub-100ms latency and 70% downtime reduction. Proficient in **Node.js, TypeScript, Python, MongoDB, Docker**, and CI/CD. Published AI researcher (Zenodo, 2025). Strong problem-solving skills with **200+ DSA problems** solved on LeetCode.

TECHNICAL SKILLS

Backend: Node.js, Express.js, TypeScript, Python, REST APIs, WebSockets, Microservices
Frontend: React.js, Next.js, JavaScript (ES6+), Tailwind CSS
Databases: MongoDB, PostgreSQL, Prisma ORM
Cloud & DevOps: AWS (EC2, S3), GCP (Cloud Run, Pub/Sub), Docker, GitHub Actions, CI/CD
Tools & Security: Jest, Pytest, Postman, Git, JWT, OAuth 2.0, Rate Limiting, Input Validation

PROFESSIONAL EXPERIENCE

Full Stack Developer (Full-Time)

Apr 2025 – Mar 2026

Stratosfy (Remote)

Ottawa, Canada

- Led development of a production IoT temperature monitoring platform (**500+ devices**); shipped **20+ REST APIs** and **19+ microservices** on GCP (Cloud Run, Pub/Sub) via Docker at **sub-100ms** latency
- Reduced system downtime by **70%** through MongoDB schema optimisation, aggregation pipeline tuning, and proactive alerting via GCP Cloud Logging
- Engineered a real-time IoT dashboard in **React (TypeScript)** with WebSocket-driven live device feeds; optimised re-renders via **React.memo** and **useMemo**, achieving **sub-200ms** UI refresh on **500+ concurrent device** streams
- Achieved **80%+ Jest** test coverage; enforced quality via GitHub Actions CI/CD, cutting regression rate by **40%** and securing endpoints with JWT, rate limiting, and OWASP-aligned validation
- Built complex multi-step device configuration forms using **React Hook Form + Zod** schema validation, reducing invalid API submissions by **45%** and improving field-technician onboarding flow
- Delivered across **6-person** distributed Agile team (2-week sprints) using React.js, Node.js (TypeScript), Python, and MongoDB

KEY TECHNICAL PROJECTS

Flowboard | Live | Code | *Next.js, TypeScript, Prisma, Pusher, Turborepo*

- Built a collaborative Kanban workspace with **JWT-based RBAC** (Owner, Admin, Member, Viewer roles), **dnd-kit** drag-and-drop with optimistic updates, and **Pusher** WebSocket channels for real-time board sync across teammates
- Structured as a **Turborepo monorepo** with a public demo board; deployed on Vercel

Timesheet Management System | Live | Code | *React, TypeScript, Node.js, Tailwind, REST APIs*

- Designed and built a role-based timesheet platform with Employee → Manager submission and approval workflow; developed **REST APIs** for real-time data sync and interactive dashboards for productivity and time utilization
- Built reusable typed React components with CSV/PDF export reporting

Jarvis – AI-Powered Voice Assistant | Live | Zenodo | *Python, NLP, Speech Recognition, TTS*

- Developed an NLP pipeline with speech recognition and text-to-speech for hands-free voice command routing; integrated Gmail, WhatsApp, YouTube, and Weather APIs for cross-service automation
- Published as *Jarvis: AI-Powered Voice Genie* at zenodo.org/records/15123556 (2025)

EDUCATION

Rajeev Gandhi Memorial College of Engineering & Technology

2021 – 2025

B.Tech in Computer Science & Business Systems

CGPA: 8.01/10

CERTIFICATIONS & PROBLEM SOLVING

Problem Solving: Solved **200+** Data Structures & Algorithms problems on LeetCode; completed 30 Days of JavaScript Challenge; Solved Top SQL Interview Questions on LeetCode

Cloud: NPTEL – Cloud Computing, IoT (2024) | AWS Educate Badges (2026)

Industry: Python – IBM (2026) | Postman API Expert (2025)

Database: MongoDB Skill Badges (2026)
